### **Description**

HIPOWER Mobile generators are an efficient, reliable and versatile source of mobile electrical power. Designed to operate in the most extreme working conditions. All HIPOWER Mobile Generators combine an innovative design and the use of high quality materials that provide the user with the most dependable power that you can rely on for non-stop power with easy to operate controls.

Powered by a radiator-cooled, industrial ISUZU Diesel engine, which meets current Environmental Protection Agency (EPA) TIER 4 Final non-road exhaust emission regulations, driving a single bearing, four-pole, three-phase alternator, with IP23 protection. The Prime Power kVA rating for generator set is given with a 105 degree °C alternator winding temperature rise.

#### HIPOWER® Features and Benefits

ISUZU Diesel Engine: Long-life, heavy-duty, 4-cycle, direct injection engine for economy of operation and maximum reliability and durability. Capable of full rated load acceptance in one step.

Cooling: Radiator with belt driven pusher fan.

Air Filter: Heavy-duty replaceable element air-cleaner.

Alternator: Single bearing, rotating field, self-excited, self-ventilated, 12-wire reconnectable, 60Hz brushless alternator with an Auxillary Winding for the AVR (Aux), with Class H insulation. Automatic voltage regulator (AVR) providing close voltage regulation and skVA starting capability for electric motor loads.

Certification: ISO 8528-5.

#### **HIPOWER®** Features and Benefits

Fuel Tank: Environmentally friendly steel base welded sub-base fuel tank with internal filling system and 110% containment capability for any diesel fuel, coolant or engine oil spills. Easy access for maintenance activities.

Enclosure: Fully sound attenuated enclosure, fabricated in 14-gauge steel, powder coated with finish that exceeds 1400-hr salt spray test, curved edges, minimum outside fasteners and single point lift. Ample layer of durable foam sound insulating material placed all around the inside of the container, doors and ducting with metal retaining frames. It can be cleaned with high-pressure water and is oil and fire resistant. Vertical air discharge for quiet operation. Wide steel lockable access doors with rubber seals, easy access for maintenance and service activities, lift off die cast zinc textured black hinges, corrosion resistant hardware and fasteners.

Exhaust: Low noise, steel residential-type exhaust silencer with rain cap.

Fuel Filtration: Standard and secondary water separator with visible level on fuel filters

Voltage Selector Switch: Three-position, manual voltage selector switch. Lockable in three positions for switching set between 120/240V single phase and 120/208 and 277/480V 3-phase.

Controls: Digital control panel with manual and automatic start and stop features. Many programmable automatic functions for local and remote controls with LED lights, tamper proof engine hour recorder. Load Connections: Covered distribution panel for easy access to cable power outlets, receptacles, lugs and Camloks.

## APPLICATION DATA

| ENGINE SPECIFICATION  |  |
|---|--|
| Manufacturer  | ISUZU  |
| Model   | 4LE2T  |
| EPA certified   | Tier 4 FINAL   |
| Crankshaft speed  | 1,800 rpm  |
| Туре  | Diesel, 4-stroke                                     |
| Injection   | Direct   |
| Aspiration  | Turbocharged   |
| Number of Cylinders   | 4  |
| Cylinder arrangement  | In-line  |
| Displacement CID (liters)   | 133 (2.2)  |
| Bore and Stroke ins (mm)  | 3.3x3.7 (85X 96)                                     |
| Nominal power   | 40.2 hp  |
| Cooling   | Liquid   |
| Governor  | Electronic   |
| Governor Regulation Class   | ISO 8528 Part 1 Class G3                             |
| Frequency Regulation  | Isochronous  |
| Starting motor & alternator   | 12 volt  |
| Compression ratio   | 17.6:1   |
| Air cleaner type  | Heavy duty - single cartridge                        |
| Exhaust gas flow cu. ft./minute (cu.m. /minute)                                     | 191(5.4)   |
| Max. Exhaust temp at full load degrees °F (°C)                                      | 896 (480)  |
| Max. permissible back pressure - ins H2O (kPA )                                     | 21.6 (7.5)   |
| COOLING SYSTEM  |  |
| Engine cooling air flow - cu. ft./min (cu. m/min)                                   | 95.8 (2.71)  |
| Alternator cooling flow - cu. ft./min (cu. m/min)                                   | 251 (7.05)   |
| Total cooling air flow (engine + alternator + combustion) - cu. ft./min (cu. m/min) | 1366 (38)  |
| Total cooling capacity - US gallons (liters)  | 3.8 (14.1)   |
| Max. Operating Temperature ° F (° C)  | 122 (50)   |
| LUBRICATION SYSTEM  |  |
| Oil pan capacity - US gallons (liters)  | 2.25 (8.39)  |
| Oil pan capacity with filter - US gallons (liters)                                  | 2.75 (10.3)  |
| Oil cooler  | Liquid   |
| Recommended lubricating oil grade   | SAE 10W-40 conventional DH4 (refer to owners manual) |
| Oil consumption at full load  | < 0.1% of fuel consumption                           |
| ·   | 65 (450)   |
| Oil pressure – psi (kPA)  | 00 (100)   |
| ENGINE ELECTRICAL SYSTEM  | 40 1   |
| Starting motor voltage  | 12 volt  |
| Cold Cranking Amps - minimum  | 53 Amp   |
| Battery charging Alternantor  | 110 Amp  |
| Battery capacity  | 600 Amps   |
|   |  |

## CONTROL SYSTEMS STANDARD FEATURES - Generator Digital Control Panel

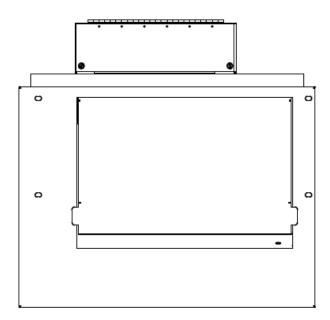

HIPOWER® COMAP IntelliLite MRS16 Control Panel: The IntelliLite MRS16 digital control panel is back-lit with icon LCD text display, and is PC configurable. IntelliLite MRS16 is a comprehensive controller for single gen-sets operating in Standby or Prime modes. Compact construction is optimized for these purposes and various modifications allow customers to select the optimum operation mode for a particular application.

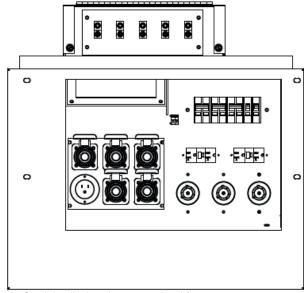

Engine alarms included: High coolant temperature, low oil pressure, low coolant level, unexpected shutdown, low fuel level, stop failure, low battery voltage, battery charging alternator failure, over-speed, under-speed, start failure and emergency stop. Support of engines with ECU (J1939, Modbus and other proprietary interfaces); alarm codes displayed in text form.

Alternator alarms included: Overload, unbalanced voltage, over voltage, under voltage, over frequency, under frequency, short circuit, reverse power, and incorrect phase sequence.

#### DISTRIBUTION PANEL VIEW

\* Camloks displayed are an optional feature.
